

MyCloud Hosted Network Security Comprehensive Network Protection in the Cloud

Cerberus Networks provides hosted security services for clients wanting to centralise and simplify network security while reducing costs and administration overheads. Our solutions are designed around firewalls from the UTM market leader, Fortinet. Working with a certified FortiPartner, you can be assured of expert security administration and network management. With comprehensive 24x7 monitoring and reporting, you can help your customers retain control of the security issues affecting their networks and prevent data loss or downtime.

MyCloud Hosted Network Security comprises the operation and maintenance of centralised, high-availability security platform, software and policies, and 24x7 management and monitoring by the Cerberus Network Operations Centre (NOC). The Cerberus NOC proactively responds to new threats, and draws on the security expertise of our Fortinet accredited technicians in order to secure client network infrastructure.

MyCloud hosted firewall offers the following key benefits:

Reduced costs for providing the same level of network protection as an onsite firewall	Reduced complexity - single hosted firewall for multiple sites, including colo or hosted computing
Eliminates upgrades, repairs and hardware obsolescence	Block suspicious traffic before it gets near your customer's network
Higher uptime due to clustered hardware platform	Removes the need for in-house security administration

Fortinet Unified Threat Management

The Fortinet FortiGate Unified Threat Management platform combines the FortiOS™ security operating system with FortiASIC processors to provide a comprehensive and high-performance array of security and networking functions including:

- Firewall and Traffic Shaping
- Antivirus/Antimalware
- Intrusion Prevention System (IPS)
- Web Content Filtering
- IPSec and SSL VPN Gateway
- Application Control (e.g., IM, P2P, etc)
- Policy-based Routing
- Directory Integration for Security Polices

FortiGate appliances provide cost-effective, comprehensive protection against network, content, and application-level threats - including complex attacks favoured by cybercriminals - without degrading network availability and uptime.

Functionality without Complexity

MyCloud Hosted Network Security Features	
Real-time network scanning for Internet threats	Understand more about your customer's network with these bespoke firewall activity reports. Reports include: blocked intrusions, bandwidth peak-times, top Web sites visited, etc.
Low Admin Overhead	Protect your network from the latest generation of Internet-based threats – with real-time anti-virus scanning, Web content filtering, and intrusion prevention services.
Accredited telephone technical support	Our team of accredited Fortinet and network engineers will assist you with any firewall or network related query, and will provide you with quick diagnostics for any firewall fault.
VPN Management and Maintenance	Let your business reap the benefits that remote working and private site-to-site communications have to offer without the concerns of compromised security.
On-going firewall policy and configuration updates	Our support team are on hand to manage and maintain all areas of the firewall including VPN tunnel configuration, traffic shaping and customised Web content filtering.
Best of breed security platform	Fortinet's market-leading UTM firewalls are at the heart of our security solutions. These award-winning firewalls offer real-time network protection from Internet-borne threats without impacting network performance.

End-to-end Service, Management and Reporting

With any security system, there is no such thing as a 'fit and forget' solution. Threats change and evolve as do the needs of your clients' businesses. From new forms of malware to changing requirements for remote connectivity and traffic filtering, the proliferation of threats leaves networks vulnerable to attack resulting in downtime or loss of data.

Guaranteed 24x7 Hardware SLA

Based on a high-availability clustered architecture, MyCloud Hosted Security provides full failover in case of hardware faults. This means dramatically reduced downtime versus a single on-premise device.

Security Management & Administration

Our security management services provide straightforward, on-demand remote management for your equipment. As well as responding to support calls and configuration requests within a Service Level Agreement (SLA), we take care of all firmware upgrades on the appliance and perform a configuration backup daily in case of fault or failure.

Managed Security Reports

Ongoing, detailed and tailored reports on security alerts and user activity provide clear insight into your customers' networks and enable you to quickly identify areas that need immediate attention – as well as highlighting potential upgrades or project work.

Secure Connectivity Solutions

Cerberus Managed Security services are a core component of our Secure Connectivity solutions. Making full use of the advanced routing and load-balancing features of the Fortinet UTM firewalls, these services provide fully managed, secure and resilient Internet connectivity using multiple carriers meaning your customers stay online.

Straightforward pricing for networks of 10 -250 Users

MyCloud Hosted Network Security is billed monthly based on the resources and services in use.

Set-up and Configuration charges will apply based on your network design. Please ask your account manager for details.

All pricing excludes VAT

MyCloud Hosted Network Security – 50Mbps		Price/Month		
Contract		12 Months	24 Months	36 Months
MyCloud Hosted Firewall - Virtual Domain	Virtual domain for separated management of virtual firewall	£110.00	£105.00	£100.00
MyCloud Hosted Firewall - Firewall & VPN	Inc. 8x5x4 hour tech support, 5 incidents, unlimited IPSec and SSL VPN	£18.00	£17.00	£16.00
MyCloud Hosted Firewall - Real time Antivirus/Antimalware	Real-time AV filtering subscription	£35.00	£33.00	£31.50
MyCloud Hosted Firewall - Web Content Filtering	Category-based Web content filtering subscription	£18.00	£17.00	£16.00
MyCloud Hosted Firewall - Intrusion Prevention	IPS subscription	£25.00	£23.50	£22.50
MyCloud Hosted Firewall - Reporting Services		£18.00	£17.00	£16.00
MyCloud Hosted Network Security – 100Mbps		Price/Month		
Contract		12 Months	24 Months	36 Months
MyCloud Hosted Firewall - Virtual Domain	Virtual domain for separated management of virtual firewall	£110.00	£105.00	£100.00
MyCloud Hosted Firewall - Firewall & VPN	Inc. 8x5x4 hour tech support, 5 incidents, unlimited IPSec and SSL VPN	£30.00	£28.50	£27.00
MyCloud Hosted Firewall - Real time Antivirus/Antimalware	Real-time AV filtering subscription	£50.00	£47.50	£45.00
MyCloud Hosted Firewall - Web Content Filtering	Category-based Web content filtering subscription	£30.00	£28.50	£27.00
MyCloud Hosted Firewall - Intrusion Prevention	IPS subscription	£40.00	£38.00	£36.00
MyCloud Hosted Firewall - Reporting Services		£30.00	£28.50	£27.00
Management services upgrade				
Tech Support - Upgrade to 10 x 15 min. incidents per month		£30.00	£30.00	£30.00
Tech Support - Upgrade to 15 x 15 min. incidents per month		£60.00	£60.00	£60.00
